

## 2018 STATEWIDE MEDICAL AND HEALTH EXERCISE Exercise Directory

---

### **\*\*\* THIS IS AN EXERCISE \*\*\***

Exercise participants should use this Communications Directory for communications during exercise play. Normal communications protocols will be utilized throughout the exercise but will use the phone numbers identified in the Communications Directory. If normal communication procedures direct you to contact a participating entity, please do so by using the listed phone numbers. For example, if your plan requires you to notify the Orange County Health Care Agency (OCHCA) for assistance/support, please use the numbers listed in this Communications Directory.

**As a reminder, all spoken and written communication will start and end with the statement: *"THIS IS AN EXERCISE."***

If information cannot be obtained through normal communications channels because the entity is not listed, you should contact the Simulation Cell (SimCell). The SimCell numbers are provided so you can contact any non-participating entity. Numbers are categorized by discipline. In addition, a "catch all" number has also been established. The catch all number can be used when questions or issues arise that would be directed to an entity that is not listed among the SimCell numbers already identified. For example, should a participant require information from an agency, department, or entity that is not participating in the exercise the "catch all" number should be used. Participants should also use the catch all number in the event that they are unsure of whom to contact or what to do with the information they have received.

Additionally, numbers are listed for the Exercise Management Team (i.e. Exercise Directors, Senior Controller, and Lead SimCell Controller). These are only to be used by a site controller who needs assistance from exercise planners, including notification of any safety related issues. *Controllers* with questions or problems should call the *Senior Controller* number listed ASAP.

**These numbers are for exercise use only and should not replace real-world contact numbers in the event of a real-world emergency.**
