**Authority**

As specified in Division 9, Title 4 of the Codified Ordinances of the County of Orange (Ambulance Ordinance 3517), the Board of Supervisors establishes the maximum Basic Life Support (BLS) emergency ground ambulance rates applicable within the County’s unincorporated area and cities that have agreed with the Ordinance for the provision of licensing and regulation of ambulance services. Ordinance 3517 also establishes the authority to adjust the maximum Advanced Life Support (ALS) Paramedic Assessment and Transport rate applicable for the Orange County Fire Authority’s (OCFA) jurisdictional areas, with the exception of three cities that establish their own ALS rate.

Orange County Emergency Medical Services (OCEMS) policy #715.00 Ground Emergency Ambulance Service Rates – Adjustment identifies the process for annual rate adjustments. On August 8, 2017, the Orange County Board of Supervisors passed Board Resolution No. 17-094 which approved the revision of the ambulance rates and adopted the recommended methodology for calculation and application of future annual adjustments. The Board authorized the Health Care Agency (HCA) to make an annual adjustment effective July 1<sup>st</sup> of each year. Data is appointed from the US Department of Labor’s Bureau of Labor Statistics ([www.bls.gov](http://www.bls.gov)) to determine the percentage from the prior year and applied to the current rate.

**2022 Maximum 911 Emergency Basic Life Support Rates FY 2022-23**

Due to the discontinuation of the Los Angeles-Riverside-Orange Counties “all items” CPI index by the US Department of Labor’s Bureau of Labor Statistics in 2018, the Health Care Agency currently uses the Los Angeles-Long Beach-Anaheim “all items” CPI index to adjust the rates for mileage, oxygen, standby, and medical supplies for 2019 and thereafter. The emergency base rate continues to be adjusted using the percentage adjustment of State or Federal minimum wage increases. The Ambulance Association of Orange County agreed to the change of the new CPI method in 2019.

Description	2021 Rates	Effects of Minimum Wage <sup>1</sup>	CPI % change	\$ increase	2022 Rates (effective 7/1/22)
