

Service Table 11-Therapy Codes

Therapy means a service activity that is a therapeutic intervention that focuses primarily on symptom reduction and restoration of functioning as a means to improve coping and adaptation and reduce functional impairments. Therapeutic intervention includes the application of cognitive, affective, verbal or nonverbal strategies based on the principles of development, wellness, adjustment to impairment, recovery and resiliency to assist a beneficiary in acquiring greater personal, interpersonal and community functioning or to modify feelings, thought processes, conditions, attitudes or behaviors which are emotionally, intellectually, or socially ineffective. These interventions and techniques are specifically implemented in the context of a professional clinical relationship. Therapy may be delivered to a beneficiary or group of beneficiaries and may include family therapy directed at improving the beneficiary's functioning and at which the beneficiary is present.

DHCS will adjust the rate for group therapy (90849 and 90853) rate by 4.5. MHPs should submit claims separately for each beneficiary receiving group therapy. If time needs to be added to 90849 (multiple-family group psychotherapy) or 90853 (group psychotherapy other than multiple-family group) use add-on code G2212 with HQ modifier. DHCS will adjust the rate of the add-on code to group therapy by 4.5.
